(54) **LIQUID DISCHARGING CONTAINER**

(57) Abstract:

PROBLEM TO BE SOLVED: To replace a bag-shaped container easily in a pump type liquid discharging container in which the bag-shaped container which is to be filled with matters to be received is placed.

SOLUTION: An outside container body 1 in which an insertion hole 5 the left half of which is a circular through hole 5a and the right half of which is rectangular through hole 5b is formed in the top wall part with a recession 4 is engaged with the lower part of a mouth-neck part 11 standing from a bag-shaped barrel part slidably in the right-left direction toward the hole 5b, a head push-down type pump 7 with a bag-shaped container in which the upper surface of an outward flange 12 which is attached to the mouth-neck part 11 is put together with the lower surface of a top wall 3 is engaged with a part of a mouth-neck part right under a setting cylinder 13 forward/backward slidably into a cut groove 21 which is formed boringly in a plate part 20. Moreover, the middle part of the plate part 20 consists of a temporally fixing plate 19 which is held forcibly extractably by the lower end of the cylinder 13 and the top wall 3, and the hole 5 is formed so that a nozzle 15 can pass through the through hole 5b and a

head 16 and the cylinder 13 can pass through the hole 5a.
